**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3 and 6 recite the limitation "said remote control signal" in line 4. There is insufficient antecedent basis for this limitation in the claims.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,203,395 B1 to McElhaney in view of U.S. Patent No. 6,113,455 to Whelan et al. and "Kick Start Busy Crib Center".

McElhaney discloses the claimed invention except for the concept of the mobile unit and kicking unit being in wireless communication, a second remote control unit, and lights mounted in the kicking unit housing. However, Whelan et al. teaches a crib

mounted mobile comprising a remote control unit (64), and the "Kick Start Busy Crib Center" teaches a crib mounted activity center comprising lights mounted in the kicking unit housing (see description). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the infant activity center of McElhaney, in view of Whelan et al. and "Kick Start Busy Crib Center", such that it would provide the device of McElhaney with the aforementioned limitations for the purpose of providing a more entertaining and conveniently controllable crib toy.

Furthermore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the infant activity center of McElhaney to include a wireless communication between the mobile unit and kicking unit, since the Examiner takes Official Notice of the equivalence of a wire and wireless communication for their use in the toy art and the selection of any of these known equivalents to perform a communication function between two elements would be within the level of ordinary skill in the art.

### ***Response to Arguments***

Applicant's arguments filed on September 22, 2003 have been fully considered but they are not persuasive.

In response to Applicant's argument that there is no suggestion to combine the references, the Examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one skilled in the art would be motivated to make

Art Unit: 3712

the proposed combination of primary and secondary references. *In re Nomiya*, 184 USPQ 607 (CCPA 1975). However, there is no requirement that a motivation to make the modification be expressly articulated. The test for combining references is what the combination of disclosures taken as a whole would suggest to one of ordinary skill in the art. *In re McLaughlin*, 170 USPQ 209 (CCPA 1971). References are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. *In re Bozek*, 163 USPQ 545 (CCPA 1969). In this case, the McElhaney reference was combined with the Whelan et al. reference merely to teach the concept of using a second remote control unit in addition to the kicking unit allowing a remote user, such as a parent to activate the mobile. The McElhaney reference was also combined with the "Kick Start Busy Crib Center" reference merely to teach the concept of having lights mounted in the kicking unit housing. Examiner also takes Official Notice of the equivalence of a wire and wireless communication for their use in the toy art and the selection of any of these known equivalents to perform a communication function between two elements would be within the level of ordinary skill in the art. Therefore, modifying the McElhaney reference by providing it with a wireless communication between the mobile unit and kicking unit in place of its wired communication would have been obvious to one having ordinary skill in the art at the time the invention was made in order to improve the entertainment value of the crib toy. Examiner therefore reasserts the rejection.

**Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
